Cerdek press room

Cerdek AI holds its first school talk at SMJK Heng Ee Cawangan Bayan Baru

12 November 2026

Co-founder Wong Shin Chen spoke to the school's Form 4 cohort about revising for SPM with AI, and students tried Cerdek AI on the spot.

PENANG, 12 November 2026 — Cerdek AI today held its first school talk at SMJK Heng Ee Cawangan Bayan Baru. Co-founder Wong Shin Chen spoke to the school's entire Form 4 cohort in the school hall about how to revise for SPM with AI, and how to use it the right way.

AI can explain a concept, check an answer or point out a mistake in seconds. But it only helps if students use it to understand, not to copy.

Wong Shin Chen also explained why Cerdek AI checks every answer against the official KSSM syllabus. General AI tools are powerful, but they do not always match what Malaysian students are taught in class, and in an exam that difference costs marks. He showed how Cerdek AI's tutor can explain a topic through a student's own interests, in one of five teaching personalities.

He then introduced Mock Speaking, which lets students practise the SPM English and Bahasa Melayu speaking tests with an AI examiner, anytime and anywhere.

Several students stood up to try Cerdek AI on the spot, talking to the app in front of the whole hall.

The talk ended with a question-and-answer session.

We would like to thank SMJK Heng Ee Cawangan Bayan Baru, its teachers and its Form 4 students for having us. This was our first school talk, and we hope to visit many more schools.

Schools that would like a Cerdek AI talk can reach us using the contact details below.

About Cerdek AI
Cerdek AI is a Malaysian education technology company that makes personalised, AI-powered SPM learning accessible and affordable for every student. Learn more at cerdek.com.
